About
Tecnolynx

Tecnolynx, as the name suggest, strive to be the enabling link for businesses to embrace cutting-edge technologies. Our approach is straight forward, we take genuine care of customers, use our wealth of experience on multiple technologies, products, and systems to support business needs of customers. We passionately follow a holistic approach in delivering customer centric solutions, that are of high quality, fits the business needs and are affordable to our clients.

We focus on implementing solutions based on open-source technologies, as these technologies are widely adapted by start-ups as well as the industry giants. Openness of these high end technologies, selfless support of contributors & community, flexibility in customizations and affordability in developing solutions have encouraged us to embrace these technologies and advocate the same to our customers to develop business solutions.

Mission

Be the enabling link for businesses to embrace cutting edge technologies.

Vision

Deliver technology solutions that keep global businesses ahead of their competition.

Why us?

Our carefully selected staff are all experts, who complement each other, share ideas and through our close working relationships, create astonishing results for our clients.

We are always striving to improve and innovate. In whatever we do, our main goal is to delight our clients with flawless execution and professionalism.

We serve a wide range of clients in a diverse set of industries around the world, and we have years of experience delivering all types of IT solutions to them.

Ecommerce Solutions

For e-commerce firms,
we provide the greatest solutions
and end-to-end functionality. Our skilled
website and application development team
has all of the necessary expertise to develop
scalable, fully working e-commerce
applications that will help your
company expand.

ERP Solutions

With tight, native connection across
processes, embedded analytics, and a
consistent in-memory data model, our ERP
system gives you more confidence in
managing business transformation
at speed.

Opensource Solutions

In order to facilitate effective
opensource adoption, our dedicated
opensource Technology Expertise Group
combines domain experience with technological
capabilities across industries.

Customised Software solutions

Our software development services
are targeted at creating, engineering,
maintaining, and evolving diverse software
categories. We provide high-quality software
for the retail, finance, industrial, healthcare,
and other industries.

Our
SERVICES

Software Testing Services

Our software testing services are structured with an intelligence- and insights-driven strategy to enable speed, quality, and productivity.

IT Consultation and Management Services

Tecnolynx provides IT consulting and management services to enterprises, assisting them in growing by enhancing the way they conduct business and developing solutions that encompass every level of the organization's structure.

Web Design and Development

We start every web development project by knowing and understanding who you are, what you do, and why you do it so we can design experiences that are appealing, easy to use and provide results for your business.

UI/UX Design

We combine a strong understanding of art, cognitive science, and technology to create engaging, optimised, seamless, and highly targeted user experiences across a variety of platforms.

Our
SERVICES
